

# AI in HSE Management

## FROM YOUR CCTV FEED

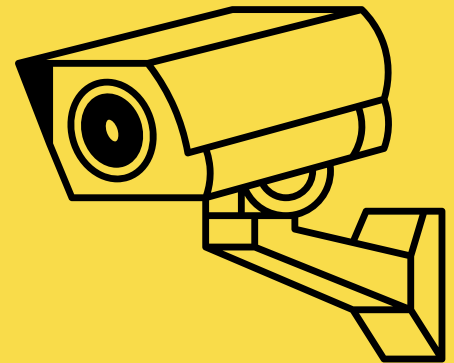

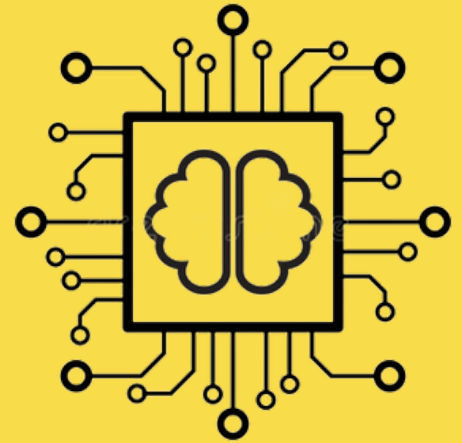

### Problem

Unsafe acts of work pose a risk to life. Identification of such safety violations at site is a challenge, especially across large areas.

### Solution

We are offering an Artificial Intelligence based solution that analyses the CCTV feed to provide automatic risk identification and reporting.

- Easy to integrate to CCTV feed
- Can identify multiple scenarios of violations like:
  - PPE violation
  - Unauthorized presence
  - Fire, and many more.
- User friendly
- Customized reporting
- Real time alerts
- Affordable system
