

The metal plate tags available in both Aluminum and Stainless Steel and in a variety of sizes to ensure that all your needs are met. The tags are designed to be used with SS wires for quick and easy installation. These tags provide an ideal way to identify cables, pipes, and other equipment. Proving to be a simple and economic solution which ensures a high-quality identification system is in place.

The tags can be laser engraved with custom text for easy and permanent identification. Custom sizes can also be made on request.
